

## Australian Vanadium 在旗舰项目中确定铁钛副产品的收入潜力

[Australian Vanadium Ltd \(ASX:AVL\)](#) 已从西澳大利亚州的旗舰同名项目中识别出潜在的高价值铁钛副产品，以支持其实现世界上成本最低的钒生产目标。

Australian Vanadium 项目的可融资可行性研究创新表明，该项目钒加工产生的废料流每年将产生 922,500 吨富铁煅烧材料。

通过杰拉尔顿港出售铁-煅烧副产品的能力使该项目在经济煅烧方面在全球范围内独树一帜，因为在其他项目中通常将其视为废物，并存储在专门设计的尾矿设施中。

### “发掘价值”

AVL 总经理 Vincent Algar 表示：“在靠近海岸的地方拥有一家钒加工厂，再加上我们的项目预计将产生大量富铁煅烧，这为我们从原本要被废弃的材料中发掘价值提供了一个很大的机会。

“我们的初步测试和市场评估支持了一条技术途径，将该材料升级为有价值的共同产品，这是 AVL 公司独有的。”

其股价上涨了 18% 至 1.3 分。

## Australian Vanadium identifies iron-titanium co-product revenue potential at flagship project

[Australian Vanadium Ltd \(ASX:AVL\)](#) has identified potential high-value iron-titanium by-products from the flagship namesake project in Western Australia to support its objective of achieving the world's lowest-cost vanadium production.

Bankable feasibility study innovations at the Australian Vanadium Project show that 922,500 tonnes per annum of iron-rich calcine material will be generated as a waste stream from vanadium processing at the project.

The ability to sell the iron-calcine co-product via the Port of Geraldton makes the project globally unique in terms of an economic calcine sale as it is generally considered as a waste product in other projects and is stored in specially designed tailings facilities.

### “Unlocking value”

AVL managing director Vincent Algar said: “Having a vanadium processing plant located close to the coast, combined with the amount of iron-rich calcine that’s forecast to be generated by our project, offers a big opportunity to unlock the value from what would otherwise be waste material.

“Our preliminary tests and market review support a technical path to upgrade the material to be a valuable co-product, unique to AVL’s operation.”

Shares are 18% higher at 1.3 cents.
