

Australian Vanadium 在焙烧浸出中试生产高纯五氧化二钒

Australian Vanadium Ltd (ASX:AVL) 采用湿法冶金方法，从代表性浸出液中生产高纯度五氧化二钒，作为澳大利亚钒项目详细流程验证计划的一部分进行了测试。

公司认为，该项目生产的钒片产品质量“优秀”，可与现有全球生产商的高纯度产品媲美。

目前正在进行冶金试验工作计划，以优化钒精炼过程的最后阶段，包括沉淀和 V₂O₅ 生产。

Australian Vanadium produces high-purity vanadium pentoxide in roast-leach pilot tests

Australian Vanadium Ltd (ASX:AVL) has produced high-purity vanadium pentoxide from representative leach liquor using hydrometallurgical methods, tested as part of a detailed flowsheet validation program for the Australian Vanadium Project.

The company believes the vanadium flake product from the project is of 'outstanding' quality, comparable to high-purity products from existing global producers.

A metallurgical test-work program is underway to optimise the final stages of the vanadium refining process, which includes precipitation and V₂O₅ production.
